Tanishq Kokane

7385990561 | tanishqkokane@gmail.com | linkedin.com/in/tanishq-kokane | github.com/tanishqk26

Skills

Languages: Python, JavaScript, TypeScript, SQL
AI / GenAI: LLMs, Generative AI, LangChain, RAG, AI Agents, Agentic AI, Prompt Engineering, Embeddings, Semantic Search, Hybrid Search, Reranking, Gemini, OpenAI
Backend & Automation: FastAPI, Flask, Node.js, REST APIs, JWT Auth, n8n, Webhooks, Selenium, OCR (TrOCR, PyTesseract)
Databases & Vector Stores: PostgreSQL, Supabase, Redis, Pinecone, Qdrant, pgvector, MongoDB
Frontend & Infra: React, Next.js, Tailwind CSS, Git, GitHub, Docker, Linux, Vercel

Experience

PhazeAI Aug 2026 – Present
AI Engineer *Remote*

- Shipped **8+ client-facing AI products** across sales, HR, finance, and coaching verticals on a **Next.js + Supabase + n8n** stack – including WhatsApp-native CRM agents, voice-driven lead capture, AI quotation automation, and meeting intelligence – driving measurable manual-effort reduction for **5+ paying clients**.
- Led delivery of **Meetsaar**, a meeting intelligence platform with **speaker-diarized transcription**, AI summaries, and auto-extracted action items; integrated client calendar flows and deployed to daily use across multiple customer teams, cutting post-meeting write-up time by **˜70%**.
- Built a **WhatsApp voice-to-lead** pipeline combining **Soniox** real-time STT, **LLM**-based requirement extraction, and **Supabase** storage with signed URLs – converting raw voice notes into structured CRM leads in **under 30 seconds**, replacing manual intake for client sales teams.

Vulcury LLC June 2025 – Dec 2025
Development / AI Intern *Remote*

- Engineered a two-stage supplier recommendation pipeline integrating **Zoho CRM**, **Pinecone** semantic retrieval, and **Gemini** reranking to surface the **top-10** suppliers per RFQ with explainable recommendations across **12+ certification variants** and geographic constraints.
- Built an **LLM-driven** transcript processing pipeline with **4** meeting-specific extraction modules (sales, engineering, leadership, shop-floor), extracting **15+ structured fields** per session from unstructured conversations and auto-syncing validated data to **Zoho CRM** via REST API.

NZ Solutions Jan 2025 – May 2025
Development / AI Intern *On-Site*

- Built **InvoGeni**, a document-intelligence pipeline converting PDF invoices via **OCR** (**TrOCR + PyTesseract + pdf2image**), feeding extracted text to a locally-run **LLM** for **20+ field** contextual extraction, and outputting structured accounting data to Excel via **Pandas** – cutting per-invoice processing from minutes to under **30 seconds**.
- Engineered resilient browser automation using **Selenium + WebDriver** with XPath-based element identification and **AI-assisted fallback recovery** for broken or dynamically changed locators.

Projects

AI Quotation Automation Tool *n8n, Next.js, Tailwind, Supabase, LLMs, Semantic + Keyword Search*

- Built an **email-triggered agentic workflow** in **n8n** that ingests client emails, extracts raw requirements via **LLM** parsing, and auto-drafts quotations end-to-end – eliminating manual requirement-gathering and drafting effort.
- Implemented a **hybrid retrieval** layer combining **semantic embeddings** and **keyword matching** over large catalogues in **Supabase** to map unstructured requirements to SKUs, with a **confidence-score gate** that auto-sends high-confidence quotes and routes the rest to a **Next.js + Tailwind** reviewer dashboard for edit, approve, and manual send.

Digital Mind – Personal AI Clone Platform *Next.js, Tailwind, Supabase, Qdrant, Gemini, RAG*

- Built a **RAG-based** "digital twin" platform letting coaches clone their expertise into a shareable chatbot, ingesting multi-source knowledge from **YouTube videos**, websites, and uploaded files via **Gemini** video parsing and **Gemini embedding models**.
- Designed the retrieval stack on **Qdrant** vector DB with **Supabase** auth and a **Next.js + Tailwind** frontend for persona tuning; served grounded responses through a publicly shareable link for lead qualification and client conversations.

Pratibimb – Real-Time Conversational AI System *Python, FastAPI, Redis, PostgreSQL, pgvector, React, Tailwind*

- Architected a real-time voice-to-voice conversational AI with a full **STT → LLM → TTS** pipeline, **JWT**-authenticated **FastAPI** backend, and **React + Tailwind** frontend; designed a **dual-layer memory** system with **Redis** short-term context and **pgvector** semantic long-term recall over **PostgreSQL**.

Achievements & Certifications

- **Top 50 – Code Unnati 3.0 Marathon** (Mar 2025) – Ranked top 50 among **1500+ participants** nationwide in a software engineering challenge.
- **SAP Foundation + Advanced Course** (Nov 2023) – **Certified** in Python, ML, AI, IoT, and SAP Conversational AI.
- **Organized 24-Hour Hackathon** (Aug 2024) – Led a **200+ student** hackathon end-to-end across cross-functional teams.

Education

Pune District Education Association College of Engineering Graduation: 2026
BE – Information Technology, GPA: 9.27 *Hadapsar, Pune*
